PROFESSIONAL SUMMARY

Senior Full Stack Engineer with **13 years** building and scaling business-critical B2B SaaS. Core maintainer of an ERP/POS platform serving as daily operational backbone for **2,000+ businesses** on recurring revenue. Led web engineering from solo contributor to **7-engineer team**, mentored juniors, and co-defined architecture with product & data leads. Specialized in modern React frontends, TypeScript, Node.js REST APIs, PostgreSQL/MySQL data modeling, and offline-first Flutter + SQLite mobile. Focus: frontend architecture, performance, relational modeling, and reliable transactional systems.

PROFESSIONAL EXPERIENCE

Senior Software Engineer - Wizard Solutions (B2B SaaS ERP/POS) *Jal El Dib, Lebanon | Feb 2018 – Present*

- Led migration of legacy desktop ERP to web (PHP/MySQL => **React, TypeScript, Next.js, TanStack Query**), now serving 2,000+ B2B clients on SaaS model with dedicated databases.
- Lead and mentor for web team growth from 2 to 7 engineers; conduct code reviews, onboarding, and cross-team architecture sessions.
- Built ERP frontends with **React + TanStack Query + React Testing Library**; using **Cursor IDE / AI-assisted development** to accelerate delivery.
- Rebuilt POS as **offline-first, local-first Flutter + SQLite** modern desktop app, syncing offline sales to ERP via REST API I designed and maintain.
- Fixed **silent** truncation of large invoices (**10,000+ fields**) by switching from form-data to single JSON payload.
- Eliminated missing inventory/accounting records by introducing **atomic database transactions** for invoice => inventory => accounting flows.
- Optimized large invoice save from **2+ minutes => 3 seconds** by refactoring nested DB logic and adding indexes.
- Added tenant / user / SQL query / full stack trace logging to AWS CloudWatch, reducing root-cause analysis from hours to minutes.

Software Developer - Al-Kaff Trading Company (Al-Kaff Systems) *Riyadh, Saudi Arabia | Mar 2013 – Dec 2017*

- Owned full-stack development of legacy payroll SaaS serving 400 companies (2,000+ employees each).
- Automated monthly payroll process and added auto backup; reduced manual ops and data-loss risk.
- Cut payroll runtime from **10+ min timeout => < 5 seconds** by migrating MyISAM => InnoDB, fixing N+1 queries, and implementing DB transactions.
- Migrated VPS to self-managed Linode (Ubuntu + Apache + MySQL), cutting hosting cost from **\$4,000/Year => \$90/Year (97.75% reduction)** while improving reliability.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), TanStack Query (React Query), React Testing Library, Tailwind CSS
- **Backend:** Node.js, Express.js, PHP, REST API Design
- **Databases:** MySQL, PostgreSQL, Database Design, Query Optimization, Transactions, Indexing
- **DevOps & Tools:** AWS CloudWatch, GitLab CI/CD, Git, GitHub, Linode, Linux (Ubuntu), Apache, Cursor IDE / AI-assisted dev
- **Practices:** SaaS Architecture, Modular Monolith, ERP/POS Domain, Performance Optimization, Team Leadership & Mentoring, Clean Architecture

EDUCATION

Bachelor of Sciences, Computer Science, Lebanese International University, 2012
